- ▼ Aircraft Cabin disinfection
- ▼ Cargo hold disinfection
- ▼ Cargo shipment disinfection
- ▼ Passenger baggage disinfection

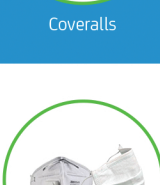

Safeguard your business today

**Our commitment to Safety and delivering optimum service is what makes us the preferred choice for Airlines**

## State of the art Coronavirus Response Kits

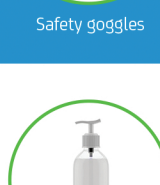

Special Personal Protective Equipment (PPE) is used for disinfection

Coveralls

High performance cleaner/disinfectant

Safety goggles

Face masks

Disposable latex gloves

Hand Sanitizer

## Cabin disinfection

Our team of cleaners wearing special PPEs is tasked with thorough disinfection of lavatories, galleys, & other areas of the aircraft cabin. Special disinfection stations containing recommended disinfectants are used for the job. Aircraft doors are closed throughout the process to ensure all mist particles have fallen on the surfaces, making it safe for passengers to board.

## Cargo hold disinfection

The empty cargo holds are disinfected using a special chemical formula, with help of chemical spraying devices. Staff wearing appropriate PPEs perform the task, making sure all corners are thoroughly covered.

## Passenger baggage disinfection

### Arrival

Offloaded Bulk baggage and ULDs are segregated and positioned on the apron for the special cleaning taskforce to perform thorough disinfection. Recommended disinfectant is sprayed using disinfection stations.

### Departure

Strapped baggage upon acceptance is moved to the sorting area for disinfection. Recommended disinfectant is sprayed using disinfection stations. All staff engaged in the disinfection process wear special PPEs.

## Cargo shipment disinfection

### Import disinfection

Inbound cargo (Bulk & ULD) is segregated on the apron after offloading, for disinfection taskforce to thoroughly perform disinfection before being moved to the warehouse.

### Export disinfection

Outbound cargo brought in is segregated away for disinfection taskforce to thoroughly perform disinfection before screening, acceptance and build-up.

## Non-negotiable focus on safety

### Standard Operating Procedures are in place for:

- ▼ Cleaning staff disembarkation (post aircraft disinfection)
- ▼ Cargo-hold and shipment disinfection
- ▼ Passenger baggage sorting and disinfection
- ▼ Coronavirus Response Kit disposal procedure
- ▼ General aircraft waste disposal
- ▼ General Hygiene practice
